Copyright 2020 Baker Hughes Company. All rights reserved. The information contained in this document is company confidential and proprietary property of Baker Hughes and its affiliates. It is to be used only for the benefit of Baker Hughes and may not be distributed, transmitted, reproduced, altered, or used for any purpose without the express written consent of Baker Hughes.

This presentation (and oral statements made regarding the subjects of this release) may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, (each a “forward-looking statement”). The words “anticipate,” “believe,” “ensure,” “expect,” “if,” “intend,” “estimate,” “project,” “foresee,” “forecasts,” “predict,” “outlook,” “aim,” “will,” “could,” “should,” “potential,” “would,” “may,” “probable,” “likely,” and similar expressions, and the negative thereof, are intended to identify forward-looking statements. There are many risks and uncertainties that could cause actual results to differ materially from our forward-looking statements. These forward-looking statements are also affected by the risk factors described in the Company’s annual report on Form 10-K for the period ended December 31, 2019 and quarterly reports on Form 10-Q for the period ended March 31, 2020 and June 30, 2020 and those set forth from time to time in other filings with the Securities and Exchange Commission (“SEC”). The documents are available through the Company’s website at: www.investors.bakerhughes.com or through the SEC’s Electronic Data Gathering and Analysis Retrieval (“EDGAR”) system at: www.sec.gov. We undertake no obligation to publicly update or revise any forward-looking statement.

The Company presents its financial results in accordance with GAAP; however, management believes that using additional non-GAAP measures will enhance the evaluation of the profitability of the Company and its ongoing operations. See the Appendix of this presentation for a reconciliation of GAAP to non-GAAP financial measures.

Three dynamics accelerating digital transformation

COVID - 19
Reducing demand and increasing costs

Improving operational efficiencies while reducing risks

Supply & Demand Imbalance
Impacting financial performance & outlook

Digital Transformation

Increasing productivity while reducing maintenance costs

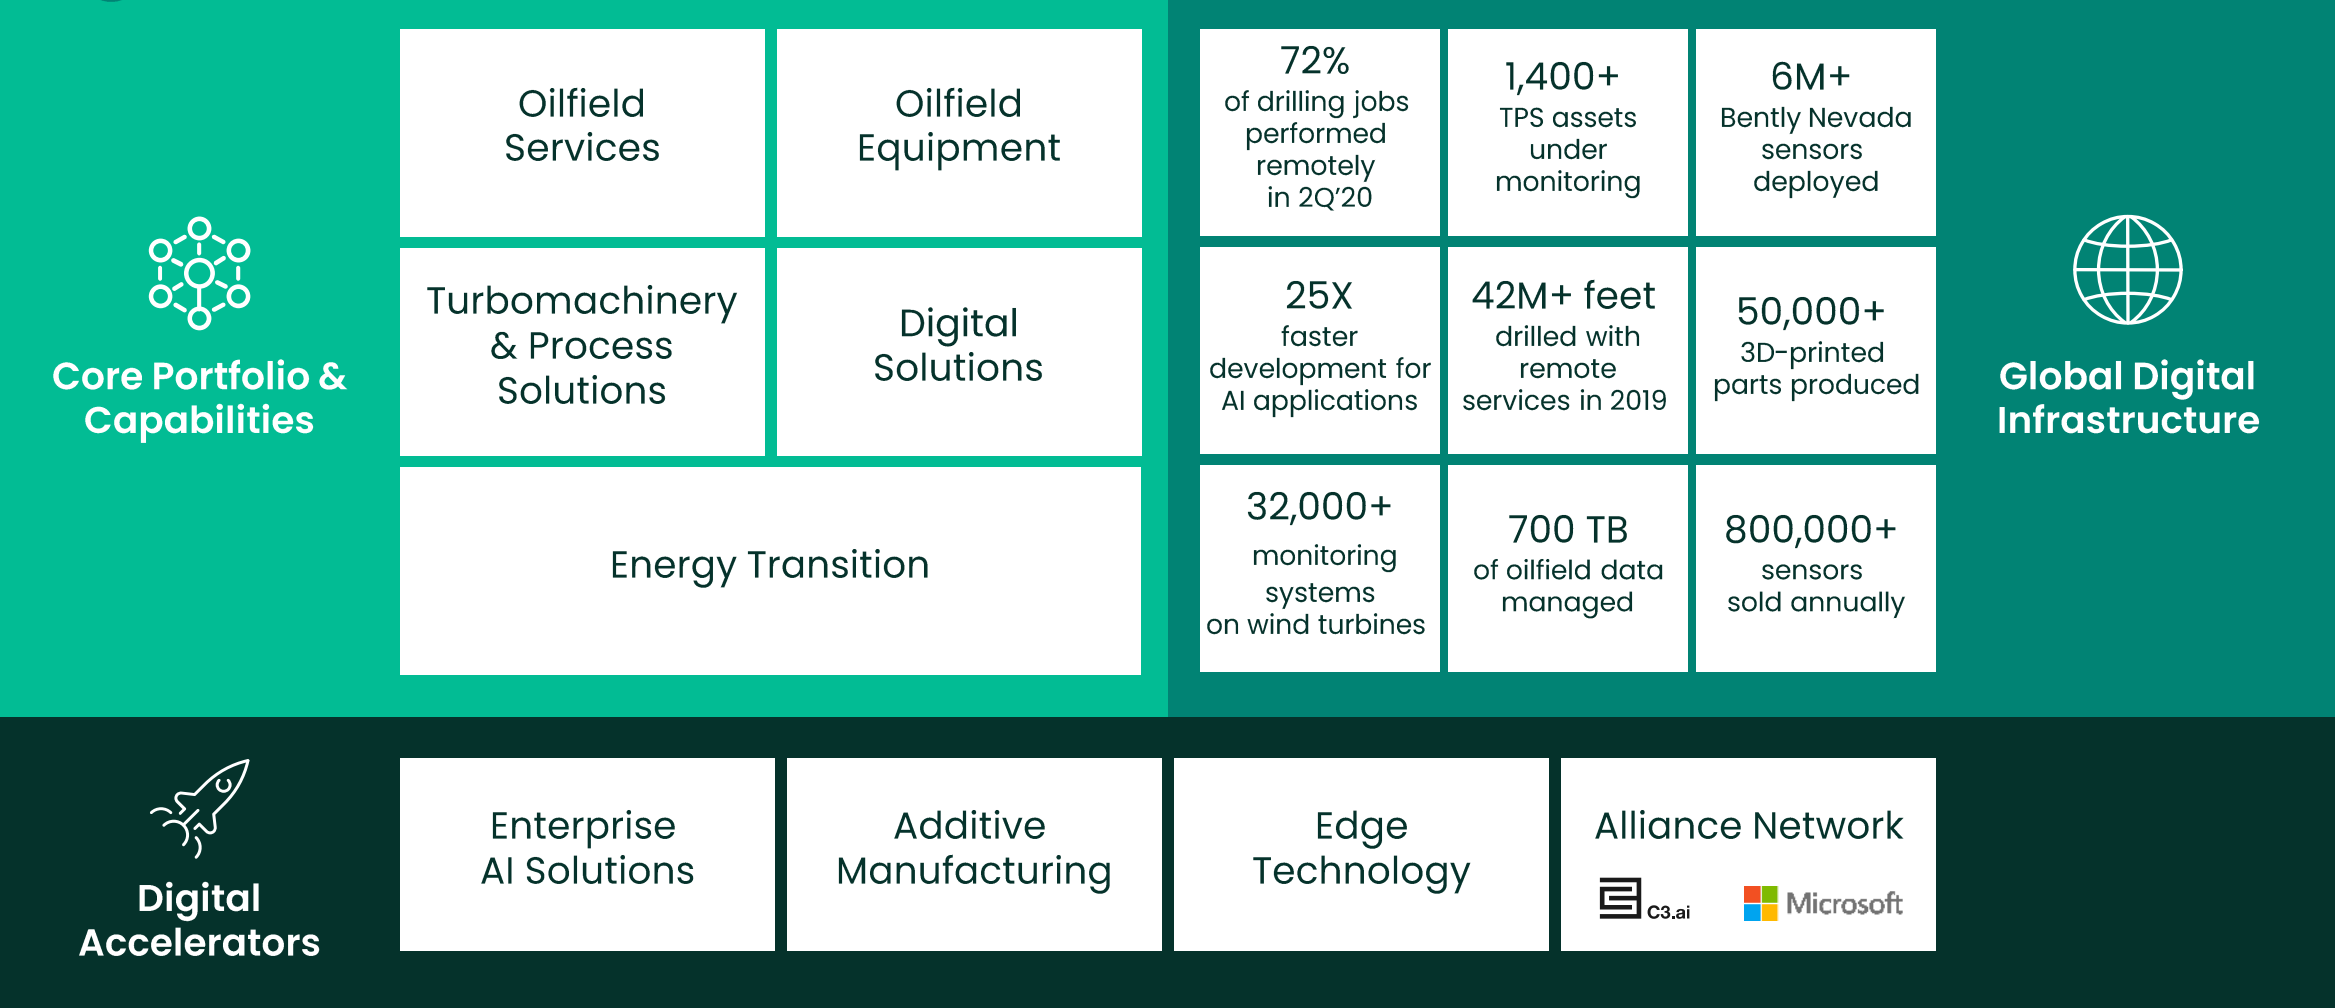

Energy Transition
Market challenges, increased social pressure for change

Accelerating energy transition

Baker Hughes uniquely positioned to drive digital acceleration

BakerHughesC3.ai is an AI leader in energy

June 2019

Launched BakerHughesC3.ai

Sep. 2019

1st Joint AI Application Available

Nov. 2019

Microsoft Alliance Announced

Feb. 2020

2nd Joint AI Application Available

Accelerate Digital Transformation of the Energy Industry

Baker Hughes Internal Uses	
Project	Value to Baker Hughes
<ul style="list-style-type: none"> • Inventory Optimization • Demand Planning • Drilling Hazards Prevention 	<ul style="list-style-type: none"> • Targeted reduction in inventory on hand • Improve materials management and demand forecasting • Optimize drilling plans to reduce NPT

Energy Customers		
Customer	Project	BHC3 AI Solution
<ul style="list-style-type: none"> • Major Oil Company • Canadian Oil Company • Multi-national Chemical Company 	<ul style="list-style-type: none"> • Rapid deployment of AI, predictive analytics & ML for energy applications • Improve well production through ML, real-time alerts, and well targeting • Improve ethylene plant efficiency through AI & anomaly detection 	<ul style="list-style-type: none"> • BHC3 AI Suite • BHC3 Production Optimization • BHC3 Reliability

Key use cases & strategic priorities of energy industry

Remote Operations

Manage data and decision-making over distance, reduce costs and improve performance

Asset Health & Reliability

Minimize asset failures, understand optimal maintenance programs and reduce operation costs across energy value chain

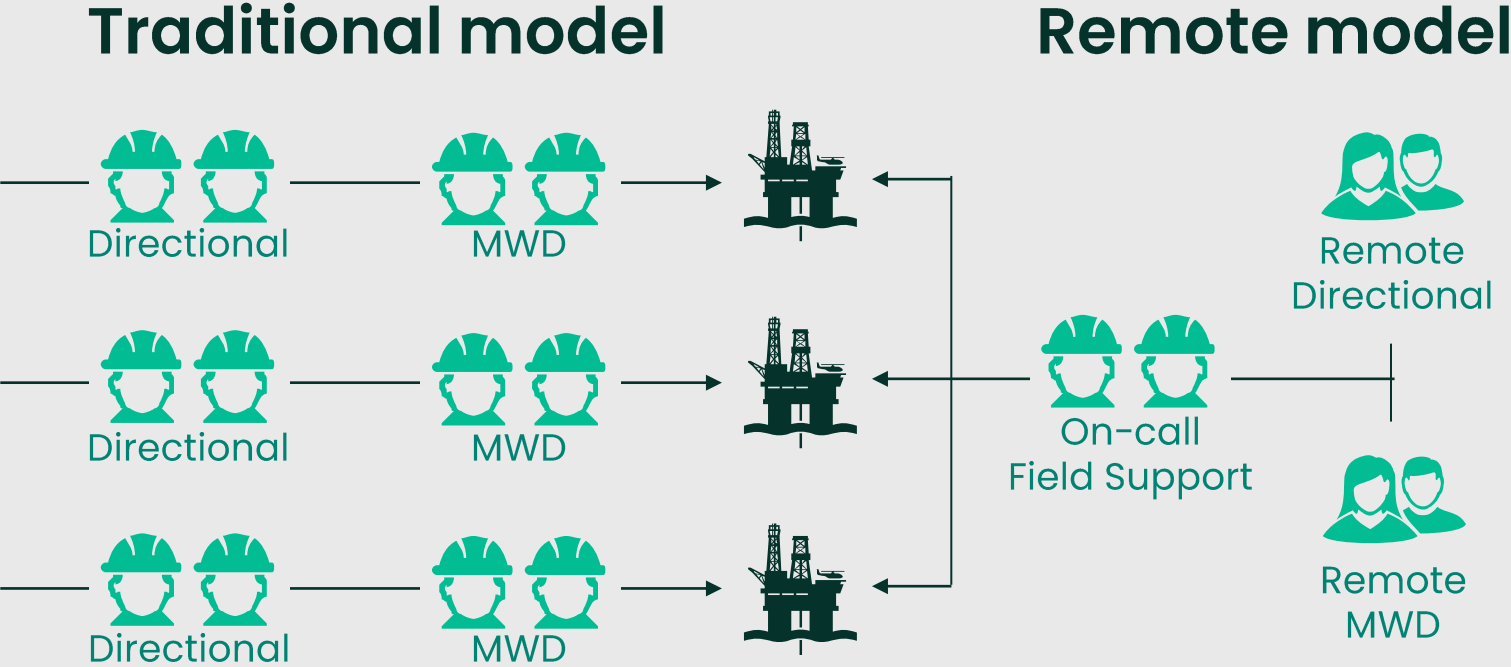

Energy Transition & Low Carbon

Reduce emissions, conserve energy and operate more efficiently

Enabling remote operations through digital

Digital Enablers

- Digital infrastructure
- Network connectivity & security
- Analytics & software applications
- Data management
- Change management
- Artificial Intelligence
- Machine Learning

Digital infrastructure to support asset health & reliability

iCenter

Asset monitoring & diagnostics for critical assets across 1,400 install base

Bently Nevada

Edge connectivity and condition monitoring for rotating equipment

BHC3™ Reliability

System-of-systems approach to deliver Balance of Plant reliability

Digital Enablers

Digital infrastructure

Advanced analytics

Sensors & edge computing

Additive manufacturing

Detecting, reducing and preventing emissions with data

Measurement & mitigation

Low to zero emissions solutions

Alternative energy services

Energy transition & low carbon consulting

Digital Enablers

AI / machine learning

Drones & robotics

Sensors & edge computing

Continuing digital innovation

Transforming the Intelligent Edge

- I.Q.uity edge platform (hardware, software, service)
- Avitas automation, environmental and analytics capabilities

Extending Additive Manufacturing

- Non-metallics materials through 50/50 Saudi Aramco JV
- Generative design capability through global additive centers and technology partnerships

Accelerating Enterprise-Scale AI in Energy

- BakerHughesC3.ai alliance leveraging the strength of our core energy businesses
- Extending and simplifying enterprise AI through technology partners

Digital technology for the energy future

- Combining core strengths with digital accelerators
- Delivering high demand use cases – remote operations, asset health, energy transition – with digital foundations
- Leveraging the BakerHughesC3.ai alliance to complement capabilities across all sectors
- Innovating for the future in edge intelligence, additive manufacturing and AI / Machine Learning

Baker Hughes
